RAPID, ANONYMOUS ALERTS
ACTIVATE TO SAVE LIVES

1 Alaska COVID ENX uses the Bluetooth technology on smartphones to exchange anonymous phone-to-phone "pings".

2 If an individual tests positive for COVID-19, they can enter their results in Alaska COVID ENX, so it will automatically and anonymously notify other pinged users of their possible exposure.

3 Alaska COVID ENX empowers you to act quickly if you come into proximity with someone who has tested positive for COVID-19.

YOUR PRIVACY IS PROTECTED:
No personal information is recorded, stored, or shared. Your location will not be tracked. It is completely secure.
